# Questions

1. **Q. Should permit fee be included in proposal?**

   A. Yes, please include estimated costs for permits

2. **Q. Will the additional scope of work be included in the budget?**

   A. Yes, please account for any costs connected to the additional work

3. **Q. Can materials be stored on site?**

   A. Yes, with no accountability to HACM

4. **Q. Will there be an Architect?**

   A. No, all work is replacing and repairing what is currently there. There will be no modifying to the foot print.

5. **Q. How can we get exact measurements?**

   A. You can call Ricardo, Delayna or Pablo to schedule a time to gain access to the property.

# 2603TRIO 60 x 30 AcrylX Alcove Three-Piece Tub Shower

| Model number: | 2603TRIOL-WH |
|---|---|

**Dimensions:** 60" x 30" x 72"    **Installation:** Alcove    **Material:** AcrylX™

## Standard Features:

- 3-Piece tub shower ideal for remodeling projects
- Classic smooth wall finish is easy to maintain
- Molded toiletry shelves (on right side of unit, regardless of drain option
- Ergonomic backrest for bathing comfort
- Left or right hand drain

## Product characteristics:

- Multi-Piece Unit
- Integrated Shelving
- Smooth Walls

## Standard Colors:

White    Bone    Biscuit

# TUB AND SHOWER FAUCET TRIM

■ Classic Bath Collection
■ Valve Only (T13022 Series)
■ Shower Only (T13222 Series)
■ Tub/Shower (T13422 Series)

## FEATURES:

▪ Monitor® 13 Series pressure balanced bath mixing valve

## STANDARD SPECIFICATIONS:

▪ Shower head max flow rate 1.75 gpm @ 80 psi, 6.6 L/min @ 550 kPa
▪ Maintains a balanced pressure of hot and cold water even when a valve is turned on or off elsewhere in the system
▪ For use with MultiChoice® Universal rough valve body. (R10000 Series)
▪ Back-to-back installation capability
▪ Solid brass fabricated body
▪ Temperature only controlled with handle. Clear knob handle with red/blue indicators
▪ Field adjustable to limit handle rotation into hot water zone
▪ 120° maximum handle rotation
▪ All parts replaceable from the front of the valve
▪ Models with "PD" suffix supplied with 6" long pull-down diverter spout (RP101818)
▪ Tub port max flow rate 8.6 gpm @ 60 psi with R10000-UNBX
▪ Universal tub spout adapter included allows for thread, sweat or slip-on installation
▪ **Note**:  Product will be marked with flow rate of specific shower head

## WARRANTY

▪ Parts and Finish - Lifetime limited warranty; or for commercial purchasers, 10 years for multi-family residential (apartments and condominiums) and 5 years for all other commercial uses, in each case from the date of purchase.
▪ Electronic Parts and Batteries (if applicable) - 5 years from the date of purchase; or for commercial purchasers, 1 year from the date of purchase.  No warranty is provided on batteries.

## WARRANTY INFO

Glacier Bay products are manufactured with superior quality standards and workmanship and are backed by our limited lifetime warranty. Glacier Bay products are warranted to the original consumer purchaser to be free of defects in materials or workmanship. We will replace FREE OF CHARGE any product or parts that proves defective. Simply, return the product / part to any of The Home Depot retail locations or call 1-855-HD Glacier (1-855-434-5224) to receive the replacement item. Proof of purchase (original sales receipt) from the original consumer purchaser must be made available for all Glacier Bay warranty claims.

This warranty excludes incidental/inconsequential damages and failures due to misuse, abuse or normal wear and tear. This warranty excludes all industrial, commercial and business usage, whose purchasers are hereby, extended a five year limited warranty from the date of purchase, with all other terms of this warranty applying except the duration of warranty.

Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights and you may also have other rights that vary from state to state and province to province. Please see a store or contact 1-855-HD Glacier for more details.
Contact the Customer Service Team at 1-855-434-5224 or visit www.HomeDepot.com

## INSTALLATION NOTES

Install this product according to the installation guide. For back-to-back toilet installations: Use only a 45° double wye fitting. Will comply with the Americans with Disabilities Act (ADA) when installed per the requirements of the 2010 ADA Standards of Accessible Design, Section 604 Water Closets, of the Act. The Model Plumbing Codes require the installation of elongated open-front toilet seats in public bathrooms. Will comply with CSA B651 when installed per Clause 4.3.6 of the standard. Will comply with OBC Barrier Free requirements when installed per Clause 3.8.3.8 and 3.8.3.9.

*THANK YOU*
*We appreciate the trust and confidence you have placed in Glacier Bay through the purchase of this medicine cabinet. We strive to continually create quality products designed to enhance your home. Visit us online to see our full line of products available for your home improvement needs. Thank you for choosing Glacier Bay!*

# Table of Contents

# Safety Information

Read and understand these instructions before you install this product.

☐    The maximum weight capacity for this medicine cabinet is 25 lbs.

⚠ **CAUTION:** Risk of electric shock. Electrical wiring may need to be relocated if installing in a new location. Please consult a qualified electrician.

**NOTICE:** Any electrical or plumbing obstructions should be removed or relocated by qualified trade personnel in strict compliance with all applicable building codes.

# Warranty

## LIMITED LIFETIME WARRANTY

Glacier Bay products are manufactures with superior quality standards and workmanship and are backed by our lifetime warranty. Glacier Bay Products are warranted to the original consumer purchaser to be free of defects in materials or workmanship. We will replace FREE OF CHARGE any product or parts that proves defective. Simply, return the product / part to any of The Home Depot retail locations or call 1-855-HDGLACIER (1-855-434-5224) to receive the replacement item. Proof of purchase(original sales receipt) from the original consumer purchaser must be made available for all Glacier Bay warranty claims.

This warranty excludes incidental/inconsequential damages and failures due to misuse, abuse or normal wear and tear. This warranty excludes all industrial, commercial & business usage, whose purchaser are hereby, extended a five year limited warranty from the date of purchase, with all other terms of this warranty applying except the duration of the warranty.

Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. This warranty fives you specific legal rights and you may also have other rights that vary from state to state and province to province. Please see a store or contact 1-855-HDGLACIER for more details.

# Pre-Installation

## PLANNING INSTALLATION

This medicine cabinet is designed for recessed installation in a standard wall opening 14 in. wide, 24 in. or 34 in. high, and 3½ in (or more) deep.

> **NOTE:** A mounting kit is available for purchase from The Home Depot if you wish to install this medicine cabinet directly to a wall. Model number GBF26.

## TOOLS REQUIRED

# Pre-Installation (continued)

## PACKAGE CONTENTS

| Part | Description | Quantity |
|------|-------------|----------|
| A | Medicine cabinet | 1 |

# Installation

## 1 Preparing for installation

NOTICE: Any electrical or plumbing obstructions should be removed or relocated by qualified trade personnel in strict compliance with all applicable building codes.

- ☐ To replace an existing cabinet, remove the old cabinet and verify that the wall opening is 14 in. wide, 24 in. high, and 3½ in. (or more) deep. Proceed to step 2 if these dimensions are correct.
- ☐ For a new installation, select a wall opening site that is centered between wall studs that are positioned 16 in. on center. Use a stud finder to locate the studs.
- ☐ The center of the wall opening is commonly located 60 in. above the floor. Alter this dimension to suit individual needs or to facilitate clearance between the top or bottom of the hinged mirror and obstacles such as counter top, faucet, electrical outlet, light fixture, ceiling, etc.
- ☐ Mark and cut the 14 in. wide x 24 in. high wall opening. Use a level to ensure the cut lines are level before you begin cutting the wall.

24 in.

14 in.

## 2 Mounting the cabinet

- ☐ Place the cabinet in the wall opening with the top of the cabinet body return flange held fully against the wall. Noting that the mounting system inside the cabinet positions the mounting screws (AA) at a 15° angle, install two screws (AA) in the upper mounting holes inside the cabinet. Use only the screws provided (do not use nails). Do not fully tighten the screw heads into the nests at this time; leave approximately ¼ in. of thread exposed. To assist with the installation, mark and drill .078 in. diameter pilot holes (at the 15° angle) into the studs and/or coat the screw threads with soap.
- ☐ Install two screws (AA) in the lower mounting holes. Leave ¼ in. of the thread exposed.
- ☐ Some walls are not flat and plumb. Using a carpenter's level, adjust as necessary to level the cabinet as viewed facing the cabinet and viewed from the side. Check the fit of the cabinet door to the cabinet body flange. Correct any gap between the door and body by shimming as necessary between the wall and the body flange at the corner diagonally opposite the gap. (Example: If the gap is top/right, shim bottom/left). Adjust the shim thickness for cross-axis alignment to achieve a satisfactory fit between the door and body.
- ☐ Tighten all four mounting screws (AA) until the screw heads are just seated in their nests. DO NOT OVERTIGHTEN!

AA
# Care and Cleaning

☐ The best and safest cleaner for a mirror is clean water used with a soft cloth.

☐ Never spray anything directly onto a mirror.  Instead, apply the cleaner to a soft cloth and then wipe the mirror.

☐ Never use any acid, alkali, abrasive or ammonia-based cleaners; they are likely to destroy the mirror and will void the warranty.

☐ Avoid drips and "puddling" at the mirror edge.

☐ Thoroughly dry all mirror edges.

☐ Medicine cabinets should be one of the last items installed in new construction to avoid contact with solvents, cleaners, etc.

☐ In humid climates, install mirrors after air conditioning is operational.

☐ Good ventilation will keep mirrors from "sweating" and creating harmful condensation.

*MERCI*
*Nous apprécions la confiance que vous avez placée dans Glacier Bay par l'achat de cette armoire de pharmacie. Nous nous efforçons*
*continuellement de créer des produits de qualité conçus pour améliorer votre maison. Visitez-nous en ligne pour voir notre gamme complète de*
*produits disponibles pour vos besoins de rénovation. Merci d'avoir choisi Glacier Bay!*

# Table des matières

# Mesures de sécurité

Lire et comprendre ces instructions avant d'installer ce produit.

☐ La capacité de charge maximale pour cette armoire de pharmacie est de 25 lb.

**MISE EN GARDE :** Risque de décharges électriques. Le câblage électrique pourrait devoir être réinstallé si vous effectuez l'installation dans un nouvel emplacement. Veuillez consulter un électricien qualifié.

**AVIS :** Toute obstruction électrique ou de plomberie devrait être retirée par un professionnel qualifié avec une stricte conformité avec les codes du bâtiment en vigueur.

# Garantie

## GARANTIE À VIE LIMITÉE

Les produits Glacier Bay sont fabriqués avec des normes de qualité supérieure et sont soutenus par notre garantie à vie limitée. Les produits Glacier Bay sont garanties à l'acheteur original d'être exempt de vices de matériaux ou de fabrication. Nous remplacerons GRATUITEMENT tout produit ou pièce qui s'avèrera être défectueuse. Retourner tout simplement le produit/pièce à l'un des magasins The Home Depot ou composer le 1-855-HDGLACIER (1-855-434-5224) pour recevoir un article de remplacement. Une preuve d'achat (facture originale) de l'acheteur original doit être mise à la disposition de toute réclamation de Glacier Bay.

Cette garantie exclut tous dommages directs ou indirects et toutes défectuosités découlant d'une mauvaise utilisation ou d'une utilisation abusive ou de l'usure et de la détérioration normales. Cette garantie exclut tout usage industriel, commercial et d'affaire, dont les acquéreurs ont par les présentes, étendu une garantie limitée de cinq ans à partir de la date d'achat, avec toutes les autres conditions de cette garantie sauf la durée de la garantie.

Certains états et provinces n'autorisent pas l'exclusion ou la limitation de dommages circonstanciels ou conséquents, dans ce cas, cette disposition ne s'appliquerait pas. Cette garantie vous donne des droits légaux spécifiques et vous pouvez également avoir d'autres droits, qui varient d'une province à l'autre. Veuillez visiter un magasin ou appeler le 1-855-HDGLACIER pour plus de détails.

# Préinstallation

## PLANIFICATION DE L'INSTALLATION

Cette armoire à pharmacie est conçue pour une installation encastrée dans une ouverture de mur standard de 14 po de largeur, 24 po ou 34 po de haut, et 3½ po (ou plus) de profondeur.

> **REMARQUE :** Un kit de montage est offert à l'achat auprès de Home Depot si vous souhaitez installer cette armoire de pharmacie directement sur un mur. Numéro de modèle GBF26.

| A | Armoire à pharmacie | 1 |

# Installation

## 1 Préparation de l'installation

**AVIS :** Toute obstruction électrique ou de plomberie devrait être retirée par un professionnel qualifié avec une stricte conformité avec les codes du bâtiment en vigueur.

- □ Pour remplacer une armoire existante, retirer l'ancienne armoire et vérifier que l'ouverture dans le mur est de 14 po de large, 24 po de haut, et 3½ po (ou plus) de profondeur. Veuillez passer à l'étape 2 si ces dimensions sont correctes.
- □ Pour une nouvelle installation, sélectionner une ouverture dans le mur qui est centrée entre les montants de cloison qui sont positionnés à tous les 16 po Utiliser un localisateur de montant pour localiser les montants.
- □ Le centre de l'ouverture du mur est généralement situé à 60 po au-dessus du plancher. Modifier cette dimension pour l'adapter aux besoins individuels ou pour faciliter le dégagement entre le haut ou le bas du miroir articulé et les obstacles tels que comptoir, robinet, prise électrique, éclairage, plafond, etc.
- □ Marquer et couper une ouverture de 14 po de large et de 24 po de haut, dans le mur. Utiliser un niveau pour s'assurer que les lignes de coupe sont de niveau avant de commencer à découper le mur.

24 po

14 po
## 2 Fixation de l'armoire

- □ Placer l'armoire dans l'ouverture dans le mur avec le haut de la bride de retour du corps de l'armoire maintenue entièrement contre le mur.  En notant le système de fixation à l'intérieur de l'armoire, positionner les vis de fixation (AA) à un angle de 15°, installer deux vis (AA) dans les trous de fixation supérieurs à l'intérieur de l'armoire. Utiliser uniquement les vis fournies (ne pas utiliser de clous). Ne pas serrer complètement les têtes de vis dans les cavités; laisser environ ¼ po de filetage apparent. Pour faciliter l'installation, marquer et percer ,078 po de diamètre de trous pilotes (à l'angle de 15°) sur les montants ou enduire les filetages de vis avec du savon.
- □ Installer deux vis (AA) dans les trous de fixation inférieurs. Laisser ¼ po du filetage apparent.
- □ Certains murs ne sont pas plats et d'aplomb. En utilisant un niveau de charpentier, ajuster si nécessaire pour mettre à niveau l'armoire comme illustré, face à l'armoire et vu de côté. Vérifier l'ajustement de la porte de l'armoire à la bride du corps de l'armoire. Corriger tout écart entre la porte et le corps par un nivellement par calage entre le mur et la bride du corps, dans le coin diagonalement opposé à l'écart. (Exemple : Si l'écart est dans la partie supérieure droite, la cale devrait être placée dans la partie inférieure gauche). Régler l'épaisseur de la cale pour l'alignement de l'axe transversal pour obtenir un ajustement adéquat entre la porte et le corps.
- □ Serrer les quatre vis de montage (AA) jusqu'à ce que les têtes de vis soient simplement logées dans leurs cavités. NE PAS TROP VISSER!

AA
# Entretien et nettoyage

☐ Le meilleur nettoyant et le plus sécuritaire pour un miroir est de l'eau propre utilisée avec un chiffon doux.

☐ Ne jamais vaporiser quoi que ce soit directement sur un miroir.  Au lieu de cela, appliquer le nettoyant sur un chiffon doux, puis essuyer le miroir.

☐ Ne jamais utiliser d'acide, d'alcali, d'abrasifs ou de produits à base d'ammoniaque; ils sont susceptibles de détruire le miroir et annuleront la garantie.

☐ Éviter de faire des coulisses et de « flaques » sur les bords du miroir.

☐ Sécher soigneusement tous les bords du miroir.

☐ Les armoires à pharmacie devraient être les derniers éléments installés dans toute nouvelle construction afin d'éviter tout contact avec des solvants, des produits de nettoyage, etc.

☐ Dans les climats humides, installer des miroirs après que la climatisation soit opérationnelle.

☐ Une bonne ventilation évitera que les miroirs « suent » et créent une condensation nuisible.

# Table of Contents

# Safety Information

⚠ WARNING: Carefully read and understand the information given in this manual before beginning the assembly and installation. Failure to do so could lead to electric shock, fire or other injuries which could be hazardous or even fatal.

⚠ WARNING: Be sure the electricity to the wires you are working on is shut off. Either remove the fuse or turn the circuit off.

NOTICE: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTICE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

# Warranty

## WHAT IS COVERED

The manufacturer warrants this lighting fixture to be free from defects in materials and workmanship for a period of five (5) years from date of purchase. This warranty applies only to the original consumer purchaser and only to products used in normal use and service. If this product is found to be defective, the manufacturer's only obligation, and your exclusive remedy, is the repair or replacement of the product at the manufacturer's discretion, provided that the product has not been damaged through misuse, abuse, accident, modifications, alterations, neglect or mishandling.

## WHAT IS NOT COVERED

This warranty shall not apply to any product that is found to have been improperly installed, set-up, or used in any way not in accordance with the instructions supplied with the product. This warranty shall not apply to a failure of the product as a result of an accident, misuse, abuse, negligence, alteration, or faulty installation, or any other failure not relating to faulty material or workmanship. This warranty shall not apply to the finish on any portion of the product, such as surface and/or weathering, as this is considered normal wear and tear.

The manufacturer does not warrant and specifically disclaims any warranty, whether express or implied, of fitness for a particular purpose, other than the warranty contained herein. The manufacturer specifically disclaims any liability and shall not be liable for any consequential or incidental loss or damage, including but not limited to any labor / expense costs involved in the replacement or repair of said product.

Contact the Customer Service Team at 1-855-HD-HAMPTON or visit HAMPTONBAY.COM.

# Pre-Installation

## PLANNING INSTALLATION

Read all instructions before assembly. Before starting installation of this fixture or removal of a previous fixture, disconnect the power by turning off the circuit breaker or by removing the fuse at the fuse box. To avoid damaging this product, assemble it on a soft, non-abrasive surface such as carpet or cardboard.

NOTE: Keep your receipt and these instructions for proof of purchase.

## TOOLS REQUIRED
Wire Strippers    Safety Goggles    Ladder    Gloves

Flathead Screwdriver    Phillips Screwdriver    Electrical Tape    Wire Cutters    Drill

## HARDWARE INCLUDED

NOTE: Hardware not shown to actual size.

## PACKAGE CONTENTS

A
| Part | Description | Quantity |
|------|-------------|----------|
| A | Fixture Body | 1 |

⚠ CAUTION: The fixture body (A) is one piece. Do not disassemble it.

# Installation

## 1 Attaching the mounting plate to the wall

- ☐ Place the mounting plate (AA) over the outlet box (sold separately), so the outlet box can be seen in the circle in the center of the mounting plate (AA).
- ☐ Use a pencil (sold separately) to gently mark the location of the four keyholes on the wall.
- ☐ Remove the mounting plate (AA) from the wall. Use a drill to bore four 5 mm deep holes in the wall, placing the holes following the location of the four keyholes on the mounting plate (AA).
- ☐ Insert the plastic anchors (FF) into the holes on the wall.
- ☐ Lightly screw the self-threading screws (EE) into the plastic anchors (FF). Be sure to leave about 1/8 in. between the heads of the self-threading screws (EE) and the wall.
- ☐ Place the mounting plate (AA) onto the protruding heads of the self-threading screws (EE).
- ☐ Gently pull down on the mounting plate (AA) until the heads of the self-threading screws (EE) slide into the narrow ends of the keyholes.
- ☐ Ensure the wires from the outlet box are either inside the outlet box, or through the hole in the center of the mounting plate (AA).

## 2 Connecting the electrical wires

- ☐ Wrap the middle of the ground wire from the fixture around the ground screw (DD) on the mounting plate (AA). Use a wire connector (CC) to connect the end of the ground wire from the fixture to the ground wire from the outlet box.
- ☐ Use a wire connector (CC) to connect the white wire from the fixture to the white wire (neutral wire) from the outlet box.
- ☐ Use a wire connector (CC) to connect the black wire from the fixture to the black wire (live wire) from the outlet box.
- ☐ Wrap the three wire connections with electrical tape for a more secure connection.
- ☐ Position the wires inside the outlet box.
# 3   Securing the fixture to the mounting plate

☐ Align the tabs on the bottom of the mounting plate (AA) with the mounting holes on the bottom of the fixture body (A).

☐ Place the fixture body (A) against the mounting plate (AA)).

☐ Screw the mounting screws (BB) into the two holes on top of the fixture body (A) to secure it onto the mounting plate (AA).

**AA**

**BB**        **A**

⚠ CAUTION: The fixture body (A) is one piece. Do not disassemble it.
# 4   Selecting the CCT option

☐ Choose your preferred correlated color temperature (CCT) from the five options: 2700K warm white, 3000K soft white, 3500K neutral white, 4000K bright white, or 5000K daylight.

☐ Move the CCT switch on the fixture (A) side-to-side to make your selection.

**A**

NOTE: The factory setting is 3000K, soft white light.
# Care and Cleaning

| ⚠ | CAUTION: Before attempting to clean the fixture, disconnect the power to the fixture by turning the breaker off or removing the fuse from the fuse box. |
|---|---|

- ☐ Clean the fixture with a soft, dry cloth.
- ☐ Do not use any cleaners with chemicals, solvents, or harsh abrasives.

# Troubleshooting

| Problem | Possible Cause | Solution |
|---|---|---|
| The fixture will not light. | The power is off. | Ensure the power supply is On. |
| | The circuit breaker is off. | Ensure the circuit breaker is in the On position. |
| The fuse blows or circuit breaker trips when the light is turned on. | The wires are crossed or the power wire is grounding out. | ☐ Check the wire connections.<br>☐ Contact a qualified electrician or call the Customer Service Team at 1-855-HD-HAMPTON. |

## Description

The Halo RL4 SeleCCTable™ is a complete LED Baffle-Trim Module for 4-inch aperture recessed downlights; suitable for new construction, remodel and retrofit installation. Using the CCT selectable switch users can chose between five different color temperatures. The lens provides uniform illumination and wet location listing. Precision construction makes any housing AIR-TITE for added savings and code compliance.

| Catalog # | | Type |
|---|---|---|
| Project | | |
| Comments | | Date |
| Prepared by | | |

## Specification Features

### CCT Select System
- Use the switch to choose between 2700K, 3000K, 3500K, 4000K, and 5000K CCT.

### Module - Trim
- Module construction includes LED array, heat sink, reflector, lens, baffle and trim ring.
- Regressed baffle
- Heat sink designed to conduct heat away from the LED array, keeping the junction temperatures below specified maximums, even when installed in insulated ceiling environments.

### LED Array
- Mid power LED array provides a uniform source with high efficiency and no pixilation.
- 90 CRI minimum, R9 greater than 50
- Color accuracy at 4 SDCM in between endpoints, provide color accuracy and uniformity.
- Color Temperature (CCT) has a selectable range from 2700K to 5000K (factory default 3000K)

### Optical Assembly
- Regressed lens
- Impact-resistant polycarbonate
- Convex form and lamp-like appearance
- Diffuse for even illumination

### Driver
- Integral 120V 60 Hz constant current driver provides noise free operation
- Continuous, flicker-free dimming from 100% to 5%.
- Inline electrical quick connect and E26 adapter (provided) provides mains connections
- See Dimming Guide for compatible dimmers

### Retention
- Push-N-Twist universal installation clips
- Clips are pre-installed and designed to fit 4" compatible recessed housings

### Designer Skins (sold separately)
- RL4 skins are accessory rings that attach to the RL4 for a permanent finish. Refer to the RL4 accessories specification sheet for details.
  - White (Paintable)
  - Satin Nickel
  - Tuscan Bronze

### Gaskets
- Closed cell gaskets achieve restrictive airflow requirements without additional caulking

### Compliance
- UL Certified
- Wet and Damp location listed
- Airtight certified per ASTM-E283
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions per FCC 47CFR Part 15 consumer limits
- Contains no mercury or lead and RoHS compliant
- Photometric testing in accordance with IES LM-79-08
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11
- Can be used for State of California Title 24 high efficacy luminaire compliance. Complies with Title 24 JA8-2016-E.
- Can be used International Energy Conservation Code (IECC) high efficiency luminaire compliance.
- ENERGY STAR® listed, reference database for current listings

### Warranty
Five year limited warranty, consult website for details.

## CT30 Series

Low-Voltage Thermostat

## Getting started

Check package contents:

- Thermostat
- Coverplate
- Wall anchors & screws (2 each)
- Caution card
- Wire labels

Before you begin, make sure you have:

- No. 2 Phillips & small pocket screwdrivers
- Hammer
- Level (optional)
- Pencil
- Drill and bit (3/16" for drywall, 7/32" for plaster)

## Remove your old thermostat

**TURN OFF POWER** at heating/cooling system (or fuse/circuit–breaker panel). Remove cover and thermostat, but leave wallplate with wires attached.

Leave wallplate in place.

Old thermostat    Cover    M23786
Is there a sealed tube containing mercury? If so, see <u>mercury notice</u> below.

**MERCURY NOTICE**
If your old thermostat contains mercury, contact your local waste management authority for proper disposal instructions.

69-2338EFS-04

# Worry-Free Kitchen Smoke and Carbon Monoxide Alarm Sealed Lithium Battery Power

## Model P3010K-CO

**Test/Hush Button**
A single button that tests alarm circuitry and temporarily silences nuisance alarms.

**LED Indicator**
A flashing red indicator blinks to correspond with alarm sound, unit error mode, and standby condition.

**Combined Smoke and Carbon Monoxide Alarm**
Unique sensor algorithm detects real fires faster and reduces cooking-related nuisance alarms.

**Sealed-In Lithium Battery**
Unit will continue to operate for 10 years. Alerts user to replace alarm after 10 years of operation.

## Description

The Kidde P3010K-CO is a 10-year, sealed battery, smoke and carbon monoxide alarm that features photoelectric and electrochemical sensing technology with Smart Hush feature. This combination alarm combines the detection capabilities of a photoelectric sensor with that of an electrochemical sensor, which is used to detect CO. When either sensor notices a potential hazard, it will communicate with the other. Depending on what is detected, the alarm will adjust its smoke sensitivity in order to better discriminate between a real hazard and a false one. This constant communication enhances the alarm's overall performance and significantly reduces the potential for a nuisance alarm.

The sealed in lithium battery will power the unit for the entirety of its 10 year life, eliminating the need for battery replacement and worry about unauthorized battery removal. The alarm provides continuous protection from smoke and carbon monoxide, even during power outages.

The alarm will automatically activate when it is attached to the mounting bracket; there are no pull-tabs, no switches, everything is automatic. At the end of alarm life, the unit will chirp, indicating the alarm is in need of replacement. The customer can use a simple tool such as a screwdriver to deactivate the unit, stopping the chirp and making it safe for disposal.

*Industry experts (such as the NFPA), recommend that both ionization and photoelectric smoke alarms be installed to help insure maximum detection of the various types of fires that can occur within the home. Ionization sensing alarms may detect invisible fire particles (associated with fast flaming fires) sooner than photoelectric alarms. Photoelectric sensing alarms may detect visible fire particles (associated with slow smoldering fires) sooner than ionization alarms.*

## Features and Benefits

- **Combination Smoke and Carbon Monoxide Alarm** – Smoke and CO sensing technologies work together to detect real fires faster and reduce cooking-related nuisance alarms.

- **Sealed-In Lithium Battery** – Sealed-in lithium power supply; no battery replacement required over the 10 year life of the alarm. Eliminates worry about battery removal or unauthorized deactivation of alarm.

- **Photoelectric Sensor** – Smoke alarm contains advanced photoelectric sensor that may detect visible particles (associated with smoldering fires) sooner than ionization alarms.

- **Self Activation** – Alarm automatically activates when attached to the mounting bracket.

- **Alarm Memory** – Rapidly flashing LED alerts user if the alarm has sounded since the last time the test/reset button was used.

- **Test/Hush Button** – Tests alarm circuitry and activates Hush features.

- **Smart Hush™** – Temporarily silences nuisance alarms for approximately 10 minutes and will not allow hush mode unless the unit is in alarm mode.

- **LED** – Red LED will blink in conjunction with the alarm sound.

- **End of Life Warning** – Alarm chirps every 30 seconds to indicate the unit is in need of replacement.

- **End of Life Hush®** – End of life indication can be silenced three days at a time up to 30 days to allow for alarm replacement at a more convenient time.

- **UL217 and UL2034 Listed**

- **10 Year Limited Warranty**

10 YEAR LIMITED WARRANTY

SIGNALING
UL® LISTED

# Architectural and Engineering Specifications

The combination smoke and carbon monoxide alarm shall be Kidde model number P3010K-CO or approved equal.  It shall be powered by a non-replaceable lithium battery with a 10-year life.  The lithium battery shall be sealed in the unit to prevent removal and/or tampering.  The unit shall incorporate a photo-electric smoke sensor and an electrochemical carbon monoxide sensor. The CO sensor shall be of a fuel cell design and provide accuracy of +/- 20% + 15 PPM. The temperature operating range shall be between 40ºF and 100ºF (4ºC and 38ºC) and the humidity operating range shall be 10%-85% non-condensing relative humidity.

The alarm can be installed on the surface of any wall or ceiling following the UL/Manufacturer's approved placement guide-lines.  The alarm shall incorporate an automatic activation fea-ture that will activate the unit as soon as it is attached to the mounting bracket, no other steps are involved.

The alarm shall include a test button that will electronically simulate the presence of smoke and CO and cause the unit to go into both modes of alarm. This sequence tests the unit's electronics to ensure proper operation.

The CO sensor will not alarm to levels of CO below 30 PPM and will alarm in the following time range when exposed to the cor-responding levels of CO.

| | |
|---|---|
| 70 PPM CO Concentration | 60 – 240 Minutes |
| 150 PPM CO Concentration | 10 – 50 Minutes |
| 400 PPM CO Concentration | 4 – 15 Minutes |

The alarm shall include a piezoelectric horn that is rated at 85 decibels at 10 feet.  For a CO incident, the horn will sound in the repetitive manner – four (4) fast beeps, a short pause, four (4) fast beeps, a short pause.  In a smoke incident, the horn will sound in the repetitive manner – three (3) beeps, a pause, three (3) beeps, a pause. The red LED will flash in conjunction with the alarm sound.

The unit shall indicate a low battery condition with a brief alarm chirp and LED flash once every 30 seconds. In standby condi-tion, the LED will flash every 60 seconds for the first 10 minutes following power on or test, and once every 10 minutes thereaf-ter. It will also flash every 10 seconds while in Hush mode.

The smoke alarm shall include an End of Life Alert, where ten years after initial power-up the unit shall chirp two times every 30 seconds to indicate the alarm needs to be replaced. The End of Life indication can be silenced for 3 days at a time for

a maximum of 30 days. The unit shall have a deactivation switch to disable it and make it safe for disposal.

The unit shall at a minimum meet the requirements of UL217, UL 2034, NFPA 72, (chapter 11 2002 edition) The State of California Fire Marshall, NFPA 101 (One and two family dwellings), Federal Housing Authority (FHA), Housing and Urban Development (HUD). It shall also include a 10-year manufacturer's limited warranty.

# Sealed Battery
# Smoke Alarm with Smart Hush™

## Part Number 900-0136          Model 0910

**LED Indicator**
A flashing red indicator light with four modes of operation: Standby, alarm mode, hush mode and memory set

**Test/Reset Button**
One button tests the unit's circuit operation and resets memory after an alarm condition occurs

**Smart Hush™ Feature**
Temporarily silences nuisance alarms. Will not allow hush to be activated unless unit is in alarm mode.

**Battery Operated**
No wiring needed

**Sealed-In Lithium Batteries**
Unit will continue to operate for 10 years

## Description

The Kidde 0910 is a 10-year, sealed battery, ionization, smoke alarm with Alarm Memory and Smart Hush™ feature. The innovative design of this alarm's automatic activation is unlike any other smoke alarm. The 0910 alarm will automatically activate when it is attached to the mounting bracket; there are no pull-tabs, no switches, everything is automatic. *At the end of the alarm life, the unit will chirp, indicating the alarm is in need of replacement.* The customer can use a simple tool such as a screwdriver to deactivate the unit, stopping the low battery chirp and making it safe for disposal.

The sealed-in board-mounted batteries will power the 0910 unit for its complete 10-year life. No replacement batteries will ever be needed.

This alarm uses ionization sensing technology. Ionization sensing alarms may detect invisible fire particles (associated with flaming fires) sooner than photoelectric alarms. Photoelectric sensing alarms may detect visible particles (associated with smoldering fires) sooner than ionization alarms.

*Kidde strongly recommends that both ionization and photoelectric smoke alarms be installed to help insure maximum detection of the various types of fire that can occur within the home*

The Kidde 0910 sealed battery operated smoke alarm features a self-activation mechanism making installation simple and easy. It also features Smart Hush™ Control allowing consumers to temporarily silence nuisance alarms and an End of Life Alert indicating it is time to replace the alarm.

At the end of the alarm's 10-year life, deactivation of the alarm is just as easy. Using a tool such as a small screwdriver, a deactivation switch removes power from the alarm and renders the batteries safe for disposal. The alarm lockout feature mechanically prevents a deactivated unit from being mounted back on the mounting bracket.

## Features and Benefits

- **Sealed-In Lithium Battery** – Sealed-in lithium power supply; no battery replacement required over the 10 year life of the alarm. Eliminates worry about battery removal or unauthorized deactivation of alarm.

- **Self Activation** – Alarm automatically activates when attached to the mounting bracket.

- **Alarm Memory** – Rapidly flashing LED alerts user if the alarm has sounded since the last time the test/reset button was used.

- **Smart Hush™** – Will temporarily silence nuisance alarms and will not allow hush mode to be activated unless the unit is in alarm mode.

- **Test/Reset Button** – Tests unit's circuit operation and resets memory after an alarm condition occurs.

- **End of Life Warning** – Alarm chirps every 30-45 seconds indicating the alarm is in need of replacement.

- **Tamper Resist** – (when activated upon installation) effective in preventing someone from removing the unit from the mounting bracket.

- **LED** – A flashing red indicator light with four modes of operation: standby, alarm mode, hush mode, and memory set.

10 YEAR LIMITED WARRANTY

SIGNALING
UL
LISTED

# Architectural and Engineering Specifications

The smoke alarm shall be Kidde unit 0910/0910CA or approved equal. It shall be powered by a non-replaceable lithium battery with a 10-year life. The lithium battery shall be sealed in the unit to prevent removal and/or tampering. The unit shall incorporate an ionization sensor with nominal sensitivity of 0.99%/ft (.87%/ft for unit 0910CA). The temperature operating range shall be between 40°F and 100°F (4°C and 38°C) and the humidity operating range shall be 5% - 95% relative humidity.

The smoke alarm can be installed on the surface of any wall or ceiling following the UL/Manufacturer's approved placement guidelines. The alarm shall incorporate an automatic activation feature that will activate the unit as soon as it is attached to the mounting bracket, no other steps are involved. The alarm shall provide optional tamper resistance that locks the unit to the mounting bracket and deters removal of the unit from the wall or ceiling.

The alarm shall include a test button that will simulate a fire condition and cause the unit to go into alarm. This sequence tests the unit's electronics to ensure proper operation.

The unit shall include a piezoelectric horn that is rated at 85 decibels at 10 feet. The unit shall include the Smart Hush™ feature that silences the unit for approximately 7 minutes if a nuisance condition occurs. The red LED will illuminate for 1.5 seconds every 8 seconds and will automatically reset itself. If the alarm is in the Hush mode and the condition that triggered the alarm persists, the alarm shall sound again to signal potential danger despite its presence in Hush Mode. The unit shall incorporate one red LED to indicate the alarm's current status and mode of operation. The LED will indicate one of four modes:

*Standby Mode:* LED will flash every 40-45 seconds to indicate the unit is operating correctly

*Alarm Mode:* LED will flash every 1.5 seconds to indicate the unit is alarming and will be accompanied by the horn sounding

*Hush Mode:* LED will illuminate for 1.5 seconds every 8 seconds to indicate the unit is temporarily silenced

*Memory Set Mode:* If Alarm Memory has been set, the LED will flash rapidly when the test button is pressed.

The unit shall include an End of Life Alert which is indicates the alarm needs to be replaced. The unit will "chirp" once every 30 seconds to notify the user. The unit shall have a deactivation switch to disable it and make it safe for disposal. The unit shall at a minimum meet the requirements of UL217, NFPA72, (chapter 11 2002 edition) The State of California Fire Marshall, NFPA101 (One and two family dwellings) Federal Housing Authority (FHA), Housing and Urban Development (HUD).
